

REMARKS

The Examiner's indications of non-compliance in the Office Actions mailed on October 31, 2006 and July 18, 2006, have been carefully considered. The specification has been amended and formatted herein to correct the matters indicated by the Examiner as being non-compliant. Included are changes to pages 2, 4, 8, 15 and 16 and claims 1, 12 and 17

The Examiner indicated in a continuation paragraph 1(c) of the July 18, 2006 Office Action that an amendment to the specification can be done in certain ways, including by replacing paragraphs. This approach has been utilized in the amendment to the specification included herewith.

In a continuation of paragraph 3(c) , the Examiner indicated that it is not clear from the earlier submitted Remarks what was done with the Figures. In response, it is respectfully indicated that the Examiner's objections to the drawings were that numeral 10 had been omitted from the drawings, element 50 was not shown the same in Figs. 6 and 7, and in Fig. 5 element 60 denotes the track not the channel as described and element 64 (in Fig. 5) should not be shown. The drawings submitted with the Amendment of April 27, 2006, show numeral 10 in Figs. 1-4, element 50 is shown consistent in both Figs. 6 and 7. In Fig. 5 element 60 designates the track and not the channel and element 64 has been deleted. Accordingly, it is believed that the Examiner's objection to the drawings have been resolved.

The Examiner also indicated in the continuation to paragraph 3(c) that the Abstract inappropriately is less than 50 words. The Abstract has been amended herewith to resolve this item.

It is respectfully submitted that the Amendment should now be considered compliant.

Allowance of this application is respectfully requested.

Bristol-Myers Squibb Company
Patent Department
